Performance Monitoring and Coaching Form (PMCF)

Name: **Arian Marie B. Soriano**
 Position: **Nurse II-SHN**

DATE	CRITICAL INCIDENT DESCRIPTION <i>(Actual events and behaviors reinforcing and hindering performance which are observed)</i>	OUTPUT	IMPACT ON JOB/ ACTION PLAN
July 7, 2026	During the Mid-Year Performance Review cum Workshop, she presented her accomplishments for the First Semester of CY 2026 using the Individual Report Card (IRC) System. All applicable IRCs were updated, clearly aligned with her IPCRF Key Result Areas (KRAs) and Objectives, and systematically compiled, sorted, and properly labeled in the SGOD Data Management System, demonstrating organized and efficient performance documentation. IRC 1A reflected the provision of technical assistance (TA) over five months, excluding January, with feedback ratings ranging from 3.952 to a perfect 4.000, all within the Very Satisfactory level. IRC 1B further showed that she served 57 clients, reflecting a moderate level of TA engagement and indicating the need to further expand client reach and responsiveness in the succeeding quarters. IRC 2A showed limited TA coverage, reaching only 27 out of 67 schools, or 40%. This included eight DEDP Priority Schools (31%) and 19 Non-DEDP Schools (46%). The considerably lower coverage of DEDP Priority Schools highlights the need for stronger and more deliberate prioritization of higher-need schools in TA delivery. IRC 2B likewise reflected a significant gap in follow-through, with	Updated and organized IRCs aligned with her IPCRF, reflecting Very Satisfactory TA ratings of 3.952–4.000 and 57 clients served; however, only 27 of 67 schools (40%) were reached, with low DEDP Priority School coverage and no follow-up TA conducted.	Exposed critical gaps in TA reach, priority-school targeting, and follow-through, driving intensified data-based interventions and systematic monitoring to accelerate school coverage, strengthen accountability, and achieve sustained TA impact.

	no follow-up TA provided to any school during the period. These findings underscore the need to intensify TA delivery and establish systematic follow-up mechanisms to ensure sustained support, effective monitoring, and timely responsiveness to identified school needs. IRC 3 reflected a Third Quarter TA commitment to reach 22 schools. Considering the substantial number of schools yet to be served, the committed target should be reviewed and recalibrated to accelerate progress toward broader school coverage. It was likewise recommended that DEDP Priority Schools be distinctly highlighted to facilitate easier identification, tracking, and monitoring and to strengthen their strategic prioritization in TA delivery. IRC 5 should also be updated to comprehensively reflect all health-related activities in which she participated during the first six months of CY 2026. All other applicable IRCs were satisfactorily accomplished. IRC 8, which consolidates her IPCRF accomplishments, indicated that most performance targets were attained and supported by corresponding Means of Verification (MOVs). However, several areas for corrective action and clarification were identified: (a) the rating period should be revised from January–December to January–June; (b) the actual date of review should be indicated; (c) KRA 1–Objectives A, B, and C should reflect Timeliness in the Actual Results; (d) KRA 1–Objective C should include a Timeliness indicator in the objective statement; (e) the timelines under KRAs 3 and 4 should be updated from 2025 to the applicable CY 2026 period; (f) the objective statements under KRA 1–Objective C and KRA 2–Objectives A and B should reflect only the minimum Efficiency target rather than a range; (g) the Actual Results under KRA 3–

Annex E - DepEd PMCF (2015)

	Objectives A and B should reflect the actual number of accomplishments rather than a range; (h) the specific IRC numbers associated with each objective's MOVs should be clearly indicated; and (i) the “CESO VI” rank of the Assistant Schools Division Superintendent (ASDS) should be reflected. Overall, her Mid-Year Performance was rated Very Satisfactory, reflecting the attainment of most performance targets and consistently high TA feedback ratings. However, the limited school coverage, lower reach among DEDP Priority Schools, absence of follow-up TA, and identified inconsistencies in performance indicators and actual results require focused attention.
